EVENT DETAILS

At the start of September 7, 2022, the available capability (AC) of the WWD1 asset was 10 MW for the settlement intervals HE 02 through HE 24 on the same day. At approximately 07:33 on September 7, 2022, the AC was restated to 0 MW impacting settlement intervals HE 08 through HE 24 on the same day. However, for certain settlement intervals these restatements were not made, and in other cases these restatements were not made as soon as reasonably practicable. Section 203.3 of the ISO rules states in part:

- (a) as a result of an acceptable operational reason;
- (b) in relation to an operational deviation and required under subsection 5(3) of section 203.4 of the ISO rules, Delivery Requirements for Energy; or
- (c) in order to reflect the output of the source asset which is restricted during either one (1) or both of commissioning and testing under section 505.3 of the ISO rules, Coordinating Synchronization, Commissioning, WECC Testing and Ancillary Services Testing or under section 505.4 of the ISO rules, Coordinating Operational Testing.

(2) A pool participant that submits an offer must, if there is a change to the available capability of the source asset as a result of any of the circumstances outlined in subsections 2(1)(a), (b) or (c), submit an available capability restatement revising the available capability for the applicable hours, as soon as reasonably practicable.

(3) A pool participant must submit the reason or reasons for submitting an available capability restatement for a source asset.
